# Public Amenity Kiosks (PAK)

**The Public Amenity Kiosk**, or PAK for short, is a free standing, three sided or two sided structure, that will contain either one or two advertising panels, and one panel available for a public amenity. Typical public amenities provided by a PAK might include a local vicinity map, community poster, or other form of public service announcement. PAKs may also include attractive signage above their panels that identifies a particular community. Both two panel and three panel PAKs will be 4 ½ feet in width and stand 9 feet tall; three panel PAKs will be arranged in a triangular in shape, with each panel forming a side.
